ABOUT ME

MCA student passionate about building real-world applications across full-stack development and AI/ML. Continuously expanding technical skills and seeking opportunities to contribute to innovative projects.

SKILLS

Languages: C, C++, Java, Python, Dart, AI/ML

Web & Frameworks: ASP.NET, Django, Flutter, HTML, CSS

Databases: MySQL, DBMS

Tools: VS Code, Visual Studio, Android Studio, Git, GitHub

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

LJ University

Bachelor of Computer Applications (BCA)

2021 – 2024

KSV University | GPA: 6.80

PROJECTS

BactoScan AI | Python, TensorFlow, OpenCV, Flutter

- Developed an AI-powered bacterial colony detection mobile app that analyzes petri dish images to identify and count bacterial colonies.
- Implemented deep learning model for automated colony segmentation and accurate counting using image preprocessing techniques.
- Built a cross-platform mobile app using Flutter that allows users to capture or upload lab images and receive real-time colony detection results.

Home Service Provider System | ASP.NET, MySQL

- Built a full-stack web app connecting users with service providers, featuring booking, online payments, admin panel, and role-based authentication.
- Managed user, worker, and service modules with an integrated wallet system.

IoT Smart Waste Segregation System | C++, Arduino

- Designed an automated dustbin that segregates waste into wet, dry, and metal categories using moisture and metal sensors, reducing manual intervention.

Hotel Management App | Flutter, PHP, MySQL

- Built a cross-platform hotel booking app with REST API integration, JSON data processing, and dynamic room listing and booking interfaces.

CERTIFICATIONS

BactoScan AI – Project Completion Certificate
